

LG295-FS Face Shield

***Please note. Mask sold separately.*

Our Face Shield consists of a PVC harness and a 0.4mm PET visor.

Maximum adjustability is provided by a ladder lock. The strap locks in place after first adjustment to easily put the shield on and take it off.

The PET shield extends above the forehead and wraps around the face without hitting the shoulder. Extra length design to completely cover the user's mask to prevent droplets getting to the mask.

Lightweight and comfortable and sits securely on the head with the overhead strap.

Simply tilting the headband allows the user to move the shield closer, or away from the face.

No fabric components to ensure easy sterilisation.

Colour of the strap varies.

34cm from temple to temple. 27cm from

Care Instructions :

- Sterilise regularly by spraying the visor and the straps with alcohol based sanitiser.
- Wipe the shield with a soft cloth to avoid scratching.

Why don't we have fabric elements in our Face Shield?

The lifespan of the Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) on textiles has not been fully determined.

Tests results vary showing that the virus lives between 3 and 8 hours. The most effective way to kill the virus is a full wash in laundry detergent or washing at over 30°C. This is not practical for a Face Shield.

Certain foam elements create an environment for both Viral and Bacterial growth.

With the necessity to re-use PPE at this critical time, concerns have been raised by medical professionals of the

desirability of textile elements in face shields.

In response, we have removed all exposed textile and foam elements from our Face Shields.

To compensate for the

barrier that the foam element provides, our visor extends well above the forehead to minimise any droplets getting over the top.

Disclaimer

As the conditions of use are beyond our control, Leo Garments accepts no liability for any adverse effects that may be suffered as a result of use of our LG295-FS face shield. This material is not anti fog.

Confirmation of Technical Specifications of the Visor available on request
